Directors Report

Dear Members,

The directors have pleasure in presenting the Third Annual Report of your Company for the year ending 31st March 2012.

Financial Performance

Your Company has recorded total revenues (gross) of Rs.153 crs (25% growth) for the year ended 31st March 2012 as compared to Rs.122 crs (gross) during the previous year. Finance and Accounts

Your Company has a portion of Accumulated losses and unabsorbed depreciation transferred pursuant to Demerger and hence the Company is not liable to Current Tax. Management Discussion and Analysis – 31st March 2012

This Management Discussion and Analysis Report is prepared in adherence to the spirit enunciated in the Code of Corporate Governance, approved by the Securities and Exchange Board of India and in compliance with the provisions of the Listing Agreement.

Overview

The Indian retail market currently stands at USD 396 billion and is likely to grow further at 12% to increase to USD 574 billion by 2015. This sector is the second largest employer after agriculture, employing more than 35 million people with wholesale trade generating an additional employment to 5.50 million more. The growing disposable income in the country is resulting in increasing consumer spending habits. The government is considering in allowing foreign direct investment (FDI) in multi-brand retailing as a measure to make India more attractive to overseas investors. The proposal, piloted by the Department of Industrial Policy and Promotion (DIPP), is currently at the discussion stage and is awaiting government clearance.

Judging by feedback obtained from a cross-section of Indian retail players, it emerges that most retailers perceived FY 2011 – 12 to be a flat year. In fact, many retailers experienced decelerated sales – the affected segments included the apparels and footwear industries, which – on the whole – grew by only 9% as compared to the 12% of the preceding year.

Overall demand outlook for the textile industry for FY13 is expected to remain moderate; with volatile commodity prices and exchange rate being key challenges for the industry. Participants who are well placed in value chain and have control over their debt levels may witness improved performance. Prospect of cotton spinning units is expected to improve with decline in cotton prices leading to a revival in demand for cotton yarn and consequent increase in capacity utilization across the cotton textile value chain. Further, with increasing urbanization, growing households and increasing disposable income, the domestic demand for denim fabric is also expected to remain healthy going forward. However, recent increase in input prices owing to the increase in crude oil prices and the stabilization of cotton prices may limit the envisaged growth prospects of the Man Made Fibre (MMF) industry.

Outlook

Trends in the Retail industry

Emergence of organized retail: Real estate development in the country, for example, the construction of mega malls and shopping malls, is augmenting the growth of the organized retail business.

Spending capacity of youth of India: India has a large youth population, which is a conducive environment to growth of this sector.

Raising incomes and purchasing power: The per capita income in India has doubled between 2000-01 and 2009-10 resulting in improved purchasing power.

Changing mindset of customers: The customer mind set is gradually shifting from low price to better convenience, high value and a better shopping experience.

Higher brand consciousness: There is high brand consciousness among the youth; 60% of India's population is below the age of 30 leading to popularization of brands and products.

Global brands are making their mark and increasing their presence across tier 1 and tier 2 cities, whilst at the same time, regional local brands are also upping their competitive presence. Certain local players have also strengthened their presence, investing in aggressive expansion in opening their own exclusive brand outlets (EBOs).

Value sales of apparel are projected to be very strong over the 2011-2016 forecast period, driven by a growing shift in preference towards Western clothing and branded products, particularly across tier I cities. Companies are also expected to branch out to tier 2 and tier 3 cities outlets across India, which represent as yet an untapped market for branded apparel. The increasing disposable income in these cities, comfort fitting and rich appeal are the major factors that are expected to drive the apparel market towards long-term growth.

Indian Terrain as a brand has proved its salience and distinctiveness. The brand was voted among the "TOP 10 MOST TRUSTED APPAREL BRANDS" in the Economic Times Brand Trust Survey.

The unprecedented rise in Input Costs, Excise Duty levy in Feb 2011 & continued high levels of inflation which dampened demand, have temporarily resulted in a margin pressures in the last year. With the softening of cotton prices and cooling of inflation, this is expected to get corrected in the coming year.

The Long term view for the retail industry and particularly Branded Apparel is very positive and Company is very bullish on the brand's performance and the possibilities. With the Apparel Industry as a whole expected to grow at a CAGR of 8-10% over the next few years and Branded Menswear Apparel expected to touch 11,000 Cr by FY'17 Indian Terrain is targeting to double its market share over this period.

Internal Control Systems and their Adequacy

The Company has developed adequate internal control system commensurate to its size and business to ensure that all assets are safeguarded and protected against any loss from unauthorized use or disposition and that all transactions are authorized, recorded and reported correctly. The internal audit reports are periodically reviewed by the Management together with the Audit Committee of the Board. The Company has a strong Management Information System as a part of Control Mechanism.

Risk Management

The Company is exposed to Interest Rate Risk. The Interest rate regime has been continuously on the hike mode for the past several quarters and this is impacting the earnings after interest.

Financial Performance

The financial statements have been prepared in compliance with the requirements of the Companies Act, 1956, and Generally Accepted Accounting Principles (GAAP) in India.

The management accepts responsibility for the integrity and objectivity of these financial statements, as well as for various estimates and judgments used therein. The estimates and judgment relating to the financial statements have been made on a prudent and reasonable basis, in order that the financial statements reflect in a true and fair manner the form and substance of transactions, and reasonably present our state of affairs and profits for the year.

4	Income Recognition: Sales net of trade discounts and rebates are recorded when the significant risks and rewards of ownership are transferred. Consignment Sales are accounted on the basis of Sales Memo received from Consignees. Sales include excise duty but exclude Sales Tax and Value Added Tax. Export Sales are accounted on the basis of the dates of Bill of Lading, other delivery documents as per the contract. Export benefits are accounted for in the year of exports based on eligibility and when there is no uncertainty in receiving the same. Interest Income is recognised on Time-Propotion basis taking into account the amount outstanding and the rate applicable.
5	Measurement of foreign currency monetary items at the Balance Sheet date and Treatment of Exchange Differences: Foreign currency monetary items of the Company outstanding at the Balance Sheet date are restated at the year-end rates. Exchange differences arising on settlement / restatement of short-term foreign currency monetary assets and liabilities of the Company are recognised as income or expense in the Statement of Profit and Loss.
6	Employees' Benefits: Provident Fund is defined contribution plan and charged to Profit & Loss Account on accrual basis with corresponding contribution to recognised funds. Leave Entitlement is short term employees benefit and determined arithmetically and charged to Profit & Loss Account on accrual basis. Gratuity Liability under Payment of Gratuity Act is determined on the basis of an actuarial valuation made at the end of the financial year and in accordance with the Revised Accounting Standard 15.
7	Taxation: Income Taxes are accrued in the same period when the related revenue and expenses arise. Provision for Current Tax is made after taking into consideration tax allowances, benefits and exemptions admissible under the provisions of the Income Tax Act, 1961. Consequent to Demerger, the Company has a portion of Accumulated losses and unabsorbed depreciation transferred from Celebrity Fashions Limited and hence the Company is not liable for Income Tax under the normal provisions of the Income Tax Act. However the Company is subject to Minimum Alternate Tax (MAT) amounting to Rs.0.47 crs (Previous Year Rs.1.29 crs). Minimum alternate tax gives rise to future economic benefits in the form of tax credit against future income tax liability. MAT credit is recognised as an asset if there is convincing evidence that the Company will pay normal tax after setting off the carried forward losses and the resultant asset can be measured reliably. During the year the Company has not recognised the eligible MAT credit as an asset, as a matter of prudence.

Deferred Tax is recognised on timing differences, being the differences between taxable income and the accounting income that originate in one period and is capable of reversal in one or more subsequent periods.

8 Impairment of Assets:

The Company assesses at each Balance Sheet date whether there is any indication due to internal or external factors that an asset may be impaired. If any such indication exists, the Company estimates the recoverable amount of the asset. If such recoverable amount of the asset or the recoverable amount of the cash generating unit to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount and the reduction is treated as an impairment loss and is recognised in the profit and loss account. If at any subsequent balance sheet date there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at recoverable amount subject to maximum of depreciated historical cost and is accordingly reversed in the profit and loss account.

In the opinion of the Management , Current Assets, Loans and Advances have a value of at least equal to the amounts shown in the Balance Sheet, if realised in the due course of the business. The provision for all liabilities is adequate and not in excess of the amount reasonably necessary.

9 Provisions and Contingent Liabilities:

Provisions are recognized when the Company has a present obligation, as a result of past events, for which it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made for the amount of obligation. Contingent liabilities are not recognized but are disclosed in the Notes.

10 Segment reporting:

The Company has considered business segment as the primary segment for disclosure. The Company is primarily engaged in a single segment business of manufacturing garments and is managed as one entity and is governed by a similar set of risks and return.
